

Create your own viewfinder

From an approximately 9" x 12" piece of rigid cardboard, cut a 6" x 8" hole in the middle. Cut a 3" x 4" hole in that piece that you cut out.

Add tick marks to the mid-point of each side of the frame.

Put tick marks on the middle of your 18" x 24" paper. What you seen in your viewfinder can then be transferred to your paper more proportionately. Use the small viewfinder for composing interior scenes and use the large one to compose exterior scenes or larger objects.
